THE PREPARATION OF HERBAL MEDICINE FOR DENTAL PROBLEMS

Abstract:
A study was conducted to prepare a herbal medicine for dental problems. The study was conducted in the Department of Chemistry, Avishkar Inter-Collegiate Institute, Mumbai. The study was conducted to prepare a herbal medicine for dental problems. The study was conducted to prepare a herbal medicine for dental problems.

Objective:
• To know about various dental problems.
• To know about the types of dental care products.
• To know about the effects of various dental care products.
• To know about the effects of various dental care products.

Methodology:
1. Selection of ingredients and glassware.
2. Take 10gms of groundnut oil, 10gms of turmeric, 10gms of pink salt and 10gms of clove.
3. Make a fine powder of pink salt, turmeric and clove.
4. Add all ingredients, mix it well and make a fine paste of it.
5. Apply 1 gm of above mixture on the teeth, if any dental problem, rub gently, repeat process twice or three or per the necessity of the dental problem. Do not use or drive anything after applying for at least 30 mins.

Disadvantages of chemical based dental care medicines:
Alloys contain zinc, nickel, beryllium, mercury, etc. These alloys, when used, release various substances in liquid, gaseous or solid form. These substances, when released, cause various dental problems. Common side effects of chemical based dental care medicines include nausea, vomiting, stomach pain, diarrhea, constipation, gas, dizziness and pain in the mouth. Chemical based dental care medicines have a few possible side effects. The side effects are: as it is not a natural product, it may cause allergic reactions. The side effects are: as it is not a natural product, it may cause allergic reactions.

Applications:
It is a best medicine for various dental problems and replacing the chemical based medicines with complete curing. It helps in the dental care products available in the market. It is a best medicine for various dental problems and replacing the chemical based medicines with complete curing. It helps in the dental care products available in the market.
